Legend

- A: second hand
- B: minute hand
- C: hour hand

SW-200 / ETA 2824-2

Automatic 11½

Description

Mechanical lever movement with 28.800 vibrations per hour (4 Hz), round calibre, automatic winding mechanism with ball bearing, 25 jewels or 26 jewels.

Functions

Analogue display of hour, minute and seconds with a date window. The power reserve is at least 38 hours when fully wound.

Operating Instructions

By turning the crown when it is in position 0 (normal position) resp. by wearing the watch on the wrist you can wind up the movement. By pushing the crown in position 2 you can correct the time, the second hand stops. In position 1 the date can be adjusted.
