- B: minute hand
- C: hour hand
- D: GMT hand

SW330-1, C125 or ETA 2893-2

Automatic 11½

Description

Mechanical lever movement with 28.800 vibrations per hour (4 Hz), round calibre, automatic winding mechanism with ball bearing, 21 jewels or 25 jewels.

Functions

Analogue display of hour, minute and seconds with a date window, additional hand shows the second time zone. The power reserve is at least 42 hours when fully wound.

Operating Instructions

By turning the crown when it is in position 0 (normal position) resp. by wearing the watch on the wrist you can wind up the movement.

By pushing the crown in position 2 you can correct the time, the second hand stops. In position 1 the date and the quick set 24-hour hand can be adjusted. **DO NOT set date when hour hand is between 9:00 and 3:00.**
